Professional Profile

Technical leader in cybersecurity with extensive experience designing microservices, optimizing performance, and building high-performing teams. Proficiency in Go, C, PowerShell.

Core Competencies

Go · C · PowerShell · Metasploit · Snort · Burp Suite · Sigma · Hashicorp Vault · Splunk · Nessus · Nmap · Redis · Elasticsearch · PostgreSQL · MongoDB · Azure Sentinel · GCP Security Command Center · AWS Security Hub · Zero Trust Architecture · Threat Modeling · OWASP Top 10 · SOC2 Compliance · Incident Response

Professional Experience

AppSec Engineer at Spotify (2022-01 – Present)

- Implemented identity management using Sigma, securing 50000+ user identities
- Created vulnerability management program using SonarQube, reducing CVEs by 25%
- Built incident response automation using SonarQube, reducing recovery time by 64%

Penetration Tester at ParseLab (2019-08 – 2021-09)

- Conducted penetration testing using MongoDB, identifying 1000+ vulnerabilities
- Implemented security monitoring using Rust, detecting 1000+ threats
- Built incident response automation using Suricata, reducing recovery time by 23%

Penetration Tester at Datadog (2018-07 – 2019-02)

- Developed threat intelligence platform using Nessus, tracking 500+ threats
- Developed threat intelligence platform using Go, tracking 50000+ threats

Security Engineer at ParseLab (2017-12 – 2018-06)

- Built secure CI/CD pipeline using Incident Response, preventing 100+ security issues
- Designed zero-trust architecture using Nessus, securing 1000+ endpoints
- Conducted penetration testing using Wireshark, identifying 1000+ vulnerabilities

Education

M.Tech. in Information Technology — Carnegie Mellon University (2018)
