

James Oconnor

Cybersecurity · 6.9 years · Joneston, UK

james.oconnor@yahoo.com · (567)465-8617 · <https://linkedin.com/in/james-oconnor> · <https://github.com/jamesoconnor>

Professional Profile

Technical leader in cybersecurity with extensive experience designing microservices, optimizing performance, and building high-performing teams. Proficiency in Go, Bash, Rust.

Core Competencies

Go · Bash · Rust · PowerShell · Suricata · Metasploit · Sigma · Trivy · Hashicorp Vault · MongoDB · PostgreSQL · Azure Sentinel · GCP Security Command Center · AWS Security Hub · SAST/DAST · Zero Trust Architecture · SOC2 Compliance · Threat Modeling

Professional Experience

Security Engineer at Quantum Edge (2023-09 – Present)

- Created vulnerability management program using Bash, reducing CVEs by 39%
- Implemented SIEM solution using Suricata, processing 100000+ logs/day
- Designed zero-trust architecture using Suricata, securing 10000+ endpoints

Penetration Tester at ResumeAI (2018-11 – 2023-04)

- Implemented encryption solution using React, protecting 100000+ records
- Implemented security monitoring using MongoDB, detecting 50000+ threats
- Conducted penetration testing using Nessus, identifying 100000+ vulnerabilities

Education

Ph.D. in Data Science — University of Washington (2020)
