

David Robertson

Backend Engineering — Clarkburgh, Australia

david.robertson@robertson.dev · 932-922-5913x651 · <https://github.com/davidrobertson>

Profile

Engineering leader with deep technical background in TypeScript, Ruby, and Rust. 9 years of experience delivering enterprise-scale solutions.

Experience

LLM Engineer

at Palantir

2022-08 – Present

Developed real-time data processing pipeline using Ansible, handling 100+ records/second
Created authentication and authorization system using Kotlin, securing 50000+ user accounts
Implemented caching layer with LLM Integration, reducing database load by 55%

LLM Engineer

at VectorDB Inc

2018-11 – 2022-07

Architected and built RESTful APIs serving 500+ requests/day using Nginx, reducing response time by 51%
Designed and implemented microservices architecture using Nginx, handling 10000+ concurrent users
Optimized database queries using Microservices, improving query performance by 19%

Server-Side Developer

at AgentForge

2016-07 – 2018-09

Optimized database queries using Actix, improving query performance by 66%
Led migration from monolithic to microservices using Python, improving system scalability by 41%
Designed and implemented microservices architecture using Rust, handling 1000+ concurrent users
Mentored team of 6 junior developers on Rust best practices

Education

B.Tech., Artificial Intelligence

2016

Columbia University

B.A., Information Technology

2015

UT Austin

Technical Skills

TypeScript, Ruby, Rust, Java, Actix, Spring Boot, LangChain, Rails, FastAPI, Neon, MySQL, Docker, Kubernetes, Jenkins, RabbitMQ, Heroku, Render, Railway, GCP, Azure OpenAI, OpenAI API, Anthropic, Claude API, RAG Architecture, Microservices

Projects

AutoScale Monitor — Designed gRPC Services leveraging Actix microservices architecture with Rails for caching

Config Manager — Developed Data Sync Platform using FastAPI, reducing processing time by 60% through algorithmic improvements

Real-time Analytics Engine — Developed Auth Service using Actix, reducing processing time by 60% through algorithmic improvements

Other

Volunteering: Volunteer coding instructor at Whitaker, Johnson and Williams Youth Program, 2023-Present
