Profile

Engineering leader with deep technical background in Go, Java, and TypeScript. 12 years of experience delivering enterprise-scale solutions.

Experience

Server-Side Developer	at Datadog	2021-09 – Present
Created authentication and authorization system using Kubernetes, securing 50000+ user accounts		
Designed and implemented message queue system using Neon, processing 10000+ messages/hour		
Optimized database queries using Spring Boot, improving query performance by 45%		
Built event-driven architecture using TypeScript, processing 50000+ events daily		
LLM Engineer	at Supabase	2017-06 – 2021-05
Optimized database queries using RAG Architecture, improving query performance by 47%		
Optimized database queries using Azure, improving query performance by 37%		
Created authentication and authorization system using ArgoCD, securing 1000+ user accounts		
Platform Engineer	at PipelineIO	2013-12 – 2017-03
Optimized database queries using AWS Bedrock, improving query performance by 47%		
Created authentication and authorization system using Python, securing 10000+ user accounts		
Architected and built RESTful APIs serving 10000+ requests/day using AWS Bedrock, reducing response time by 26%		

Education

M.Sc., Electrical Engineering	2014
University of Melbourne	
B.Eng., Information Technology	2011
Technion	

Technical Skills

Go, Java, TypeScript, Rust, Node.js, LlamaIndex, Gin, MySQL, Elasticsearch, gRPC, Kafka, Docker, Render, Fly.io, Vercel, Cloudflare, AWS, Google Gemini, Hugging Face, Replicate, Azure OpenAI, Anthropic, GraphQL, CI/CD

Projects

SmartCache — Built gRPC Services using Node.js and TypeScript, enabling automated processing and improving efficiency by 40%

Certifications

Certified Kubernetes Administrator (CNAF, 2024)

Other

Volunteering: Volunteer coding instructor at Williams-Wright Youth Program, 2022-Present

Hobby: Photography
